

EDITO

Salut à tous

L'édition de ce mois-ci fait suite à la précédente. Dans la dernière "newsletter" on avait fait un aparté sur la house music - musique de prédilection des jeunes d'aujourd'hui. Maintenant on va faire un détour sur le break dance. C'est fou comme cette danse a pu se transporter au fil des générations pour s'imposer comme un art contemporain.

On vous parle aussi sur la centralisation des activités du Nomad afin pour mieux vous servir.

En dernier lieu, des infos et un super jeu parsemé ici et là-bas pour tenir d'haleine ce seul outil qui nous tienne comme lien - Le Nomad Life.

Bonne Lecture!!

New Microsoft Program Allows Windows on Resold PCs

Microsoft launched a program to ensure that PC refurbishers and OEMs reselling used PCs to businesses are installing legitimate copies of Windows on them. The Microsoft Authorized Refurbisher (MAR) program lets OEMs (original equipment manufacturers) that take old computers and rehab them for resale license Windows those PCs in bulk. The program, launched Friday, is an extension of Community MAR which was aimed at charities, educational institutions and nonprofits. Windows licenses are tied to the computer for which they are acquired. PC refurbishers can reinstall Windows on a rehabbed PC if they have the correct proof-of-purchase documentation - called a Certificate of Authenticity - and the original OS image software necessary to return the PC to its original state.

BREAKDANCE

Le (ou la) break dance, ou breakdance, ou break, ou b-boying, est un terme utilisé pour désigner un style de danse développé à New York dans les années 1970 caractérisé par son aspect acrobatique et ses figures au sol. L'histoire commence dans le Bronx des années 1970 et est intimement liée à la destinée d'un chef de gang, membre des Bronx River Projects, une fraction des Black Spades

Origines du terme break dance

Kool Herc, un immigré jamaïcain, se rend compte que l'énergie des gens sur la piste de danse atteint son paroxysme à certains passages d'une chanson où ne sont présentes que la ligne de basse et la ligne de batterie. Il décide donc de jouer ces passages en boucle. Pour ce faire, il utilise deux tourne-disques (platines) et met le même disque sur les deux platines.

Il passe ainsi d'un disque à l'autre, répétant le même passage. Ce passage s'appelle un break, ou breakbeat. Comme les premiers breakers fréquentaient beaucoup les soirées de Kool Herc, on les a appelés les breakers ou b-boys/b-girls (b pour break), du surnom leur ayant été donné par Kool Herc lui-même

IMPORTANCE OF A WEBSITE

Nowadays website has become an integrated part of business. 5 reasons why they are important:

- Your potential customers are looking for you, from the Internet
If you are serious about your business, how could you afford to ignore this channel of getting the attention of your potential customers?
- Your competitors are there
This is like going for a trade exhibition. If you cannot stop your competitors from going there, you should at least be present, so that your potential customers are given a fair chance of comparing and subsequently buying your products or engaging your services.
- The magic of love at first sight
In this era dominated by technologies, potential clients refer mostly to website in search of knowledge about the products and services. If you have a nicely designed website, potential customers are inclined to get to know more about you.
- You and your employees need to take a break
We are all humans and humans need to take a break, therefore website plays the role of employees during breaks. This enables your business to open and be reachable around the clock and throughout the year.
- Getting a website does not cost a bomb anymore
For as little as a few hundred dollars, you can now have a decent presence on the Internet
